11 Annex 1

The visual representation uses as a starting point figure 2.5 and al features displayed have been manually created using web version of Plant UML editor.

Table 11.1. UML class diagrams reference

Notation	Visual representation example
Class	
Abstract class	
Interface	
Nested classifier	
Object	

Data Type	
Enumeration	
Association	
Operation	
Constraint	
Multiplicity	

Composite aggregation / Composition	
Association Navigability	
Generalization	
Dependency	

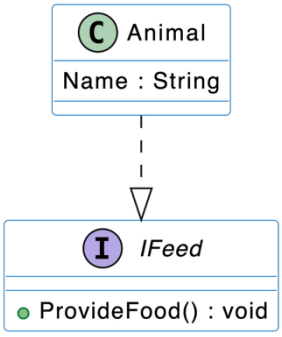

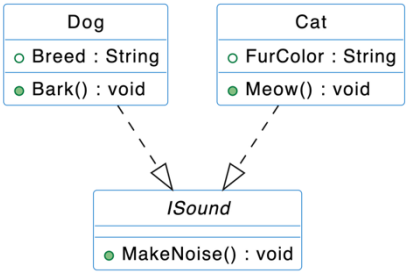

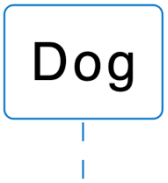

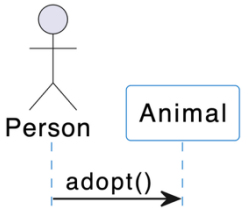

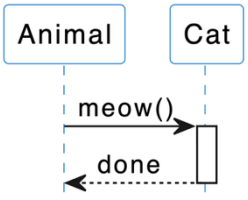

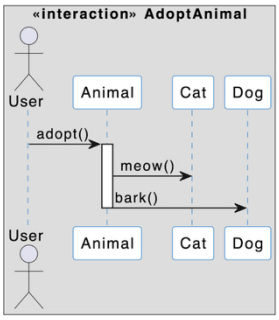

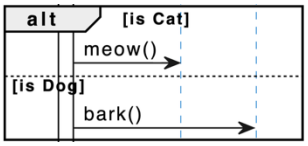

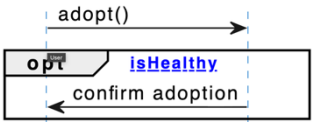

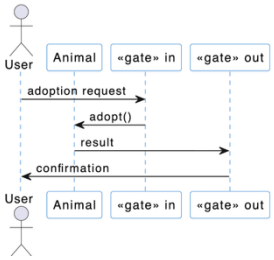

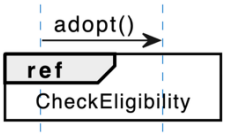

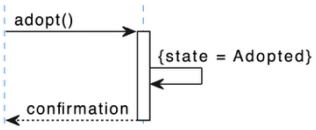

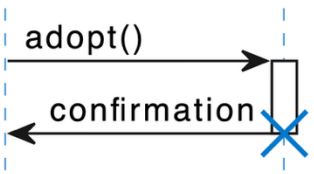

Required interface	
Interface realization	

Table 11.2. UML sequence diagrams reference

Notation	Visual representation example
Lifeline	
Message	
Execution Specification	

Interaction	
Combined Fragment	
Interaction Operand	
Gate	
Interaction Use	
State Invariant	
Destruction Occurrence	

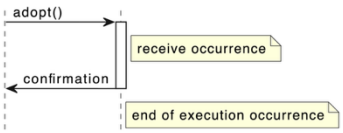

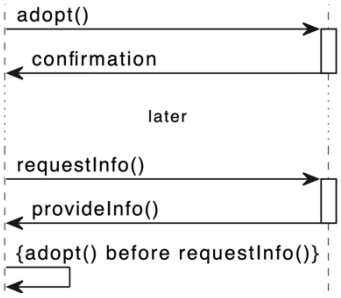

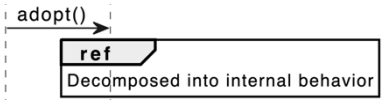

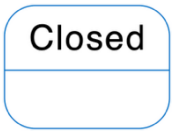

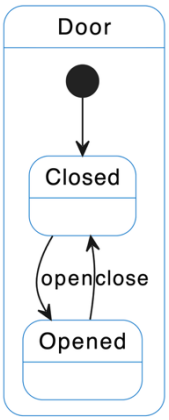

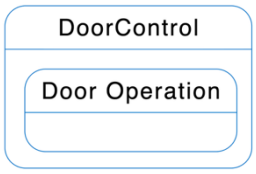

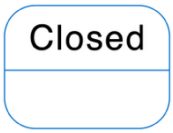

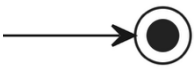

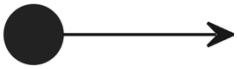

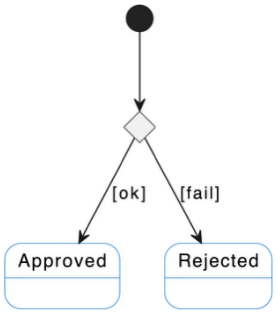

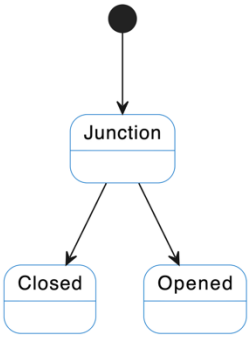

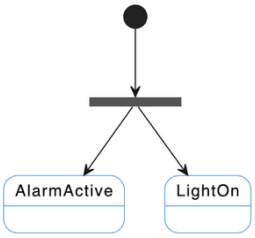

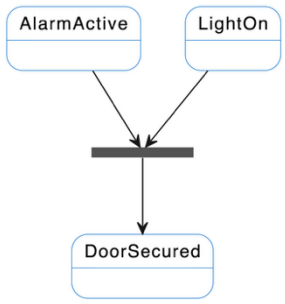

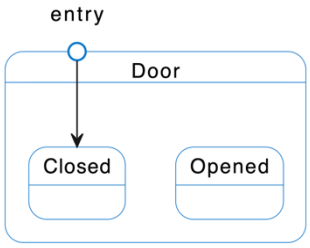

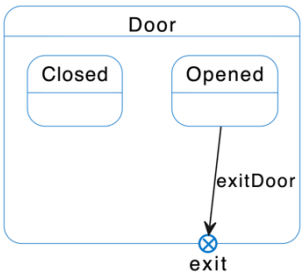

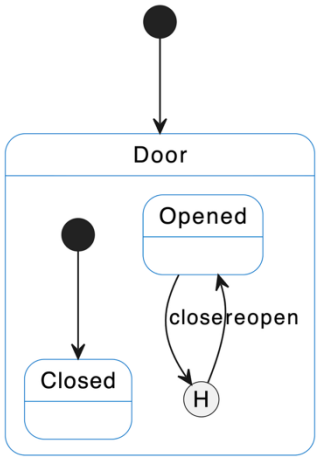

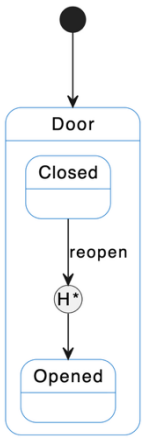

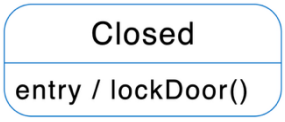

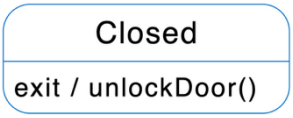

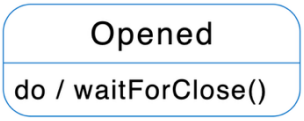

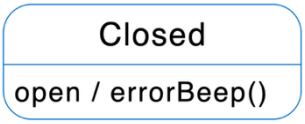

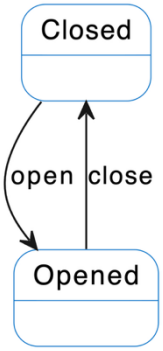

Occurrence Specification	
General Ordering	
Part Decomposition	

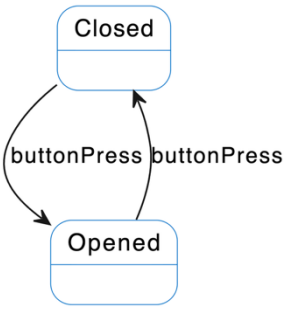

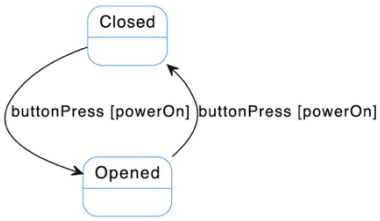

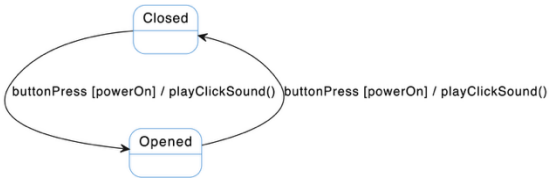

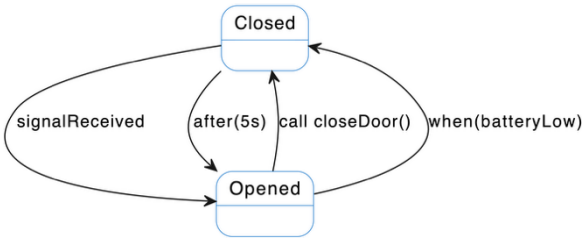

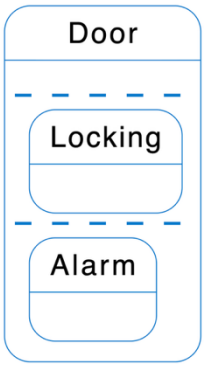

Table 11.3. UML state diagrams reference

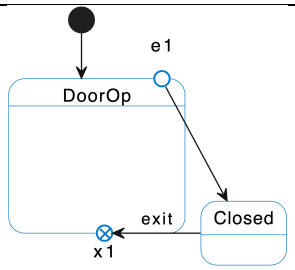

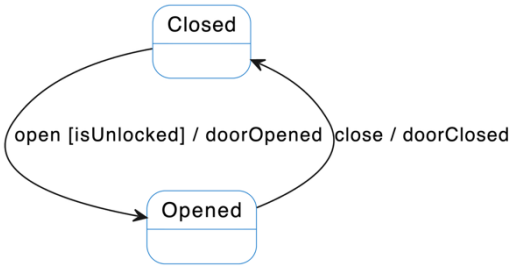

Notation	Visual representation example
State	
Composite State	

Submachine State	
Simple State	
Final State	
Initial Pseudostate	
Choice Pseudostate	
Junction Pseudostate	
Fork Pseudostate	

Join Pseudostate	
Entry Point Pseudostate	
Exit Point Pseudostate	
Shallow History Pseudostate	

Deep History Pseudostate	
Terminate Pseudostate	
Entry Behavior	
Exit Behavior	
DoActivity Behavior	
Internal Transition	
Transition	

Trigger	
Guard	
Effect	
Event	
Region	

Connection Point Reference	
Protocol State Machine	
Behavioral State Machine
